PROFESSIONAL SUMMARY

Business Analyst combining current remote delivery experience at 10Alytics with a background in operational process improvement, procurement analysis and budget management. Earlier maintenance and purchasing roles involved translating operational needs into schedules and purchasing plans, improving procedures, maintaining reliable business records and evaluating cost-saving options. Delivered a 20% reduction in equipment downtime, 15% reductions in repair and procurement costs, and \$10,000 in annual rental savings. Skilled in requirements elicitation, process mapping, user stories, Power BI and User Acceptance Testing (UAT). Currently studying for an MRes in Artificial Intelligence in Business.

CORE SKILLS

Business analysis: Requirements elicitation and analysis, Business Requirements Documents (BRDs), user stories, acceptance criteria, use cases, gap analysis, root cause analysis, process mapping and process improvement.

Delivery and stakeholders: Agile, Scrum, Waterfall, sprint planning, backlog refinement, workshop facilitation, stakeholder management, UAT, change management and project coordination.

Data and commercial analysis: Power BI, Microsoft Excel, KPI reporting, data visualisation, budgeting and forecasting, supplier evaluation, vendor management and inventory reconciliation.

Collaboration tools: Jira, Trello, Slack, Zoom, CRM systems and Google Workspace.

PROFESSIONAL EXPERIENCE

Business Analyst (Remote) | 10Alytics

Mar 2025 - Present

- Facilitate requirements workshops and document business needs in BRDs and user stories with clear acceptance criteria.
- Map current- and future-state processes, identify gaps and agree improvements with stakeholders to support more efficient workflows.
- Define project KPIs and build Power BI dashboards to track business performance and assess whether solutions meet business needs.
- Contribute to sprint planning, backlog refinement and sprint reviews within a Jira-based Agile and Scrum team.
- Collaborate with developers and business users on UAT, supporting test planning through to sign-off.
- Support change management by communicating project progress and decisions through Slack, Zoom, Jira and Trello.

Maintenance Supervisor | Gramen Petroserve Nigeria Limited, Warri, Nigeria

Aug 2022 - Apr 2025

- Process improvement: Translated equipment servicing needs into a structured preventive maintenance schedule, improving operational planning and reducing equipment downtime by 20%.
- Business process standardisation: Improved repair workflows and standardised parts usage, reducing repair costs by 15% while strengthening safety compliance and audit readiness.
- Stakeholder coordination: Led 10+ technicians and electricians to implement maintenance plans and consistent working procedures, aligning technical delivery with operational priorities.
- Budget and delivery management: Balanced facility upgrade requirements against departmental budgets and coordinated vendors to deliver projects within financial, quality and compliance constraints.

PROFESSIONAL EXPERIENCE (CONTINUED)

Maintenance Officer | Gramen Petroserve Nigeria Limited, Warri, Nigeria

Aug 2017 - Aug 2022

- Operational requirements: Translated safety standards and statutory inspection requirements into coordinated servicing and inspection activities, achieving 100% adherence to required checks.
- Data quality and process support: Maintained detailed maintenance records and inventory logs to provide reliable information for parts availability and repair coordination, improving stock accuracy and repair turnaround.
- Commercial analysis: Researched equipment rental options and evaluated costs to identify economical solutions for operational needs; negotiated terms that saved \$10,000 annually.

Purchasing Officer | Gramen Petroserve Nigeria Limited, Warri, Nigeria

Nov 2011 - Aug 2017

- Procurement analysis: Compared competitive bids and sourcing options to identify savings through vendor consolidation and bulk purchasing, reducing procurement costs by 15%.
- Requirements alignment: Translated maintenance schedules and supply needs into purchasing plans, aligning procurement activities with operational demand.
- Options evaluation: Analysed market trends and assessed lower-cost alternatives against quality needs, recommending purchasing options that balanced cost and business requirements.
- Stakeholder and supplier management: Coordinated supplier relationships and delivery commitments to ensure purchasing plans supported maintenance schedules and on-time supply.

Warehouse Officer (Post NYSC) | Gramen Petroserve Nigeria Limited, Warri, Nigeria

Oct 2010 - Oct 2011

- Recorded and inspected incoming shipments, coordinating with procurement, logistics and transport teams to maintain accurate receipt records.
- Conducted stock audits and reconciled discrepancies to improve inventory accuracy and support reliable stock information.
